

C.C.C. MONGKOK CHURCH KAI OI SCHOOL
CIRCULAR NO. 17/193E

To: Parents / Guardian

Date: 9/4/2018

" The Education University of Hong Kong. - The relationship between food
appearance and consumption of fruits and vegetables of children with
Autism Spectrum Disorders (ASD) "

Our school always concerns about students' health. Most ASD children have picky-eating habits, especially for fruits and vegetables. Our school has participated in the project mentioned above. The purpose is to explore the effect of food form in improving ASD children's fruit and vegetable intake and to improve their picky-eating habits. Before the food tasting, a questionnaire will be distributed to parents of ASD students. If participants exceeds 20, drawing lots will be used whenever necessary. Please return the **consent form** together with (**pre questionnaire**) on or before 16th April, 2018(Monday).

For enquiries, please contact our school nurse, Ms Chan Lai Chun at 2393 0119.

Yours faithfully,

(Ms Leung Wun Kam)

Principal
